Editorial

Every year on March 24 the World observes 'World Tuberculosis (TB) Day' to raise awareness

about the global impact of Tuberculosis, a disease that remains a major public health challenge. The date commemorates Dr. Robert Koch's discovery of the TB causing bacterium in 1882 which paved the way for diagnosis and treatment.

As we mark World TB Day 2025, global efforts to eliminate TB are at a critical point. While significant progress has been made, challenges such as drug-resistant TB, limited health care access and funding gaps continue to hinder eradication efforts. This year's theme focuses on accelerating action to end TB, urging governments, health organizations and communities to intensify their commitment.

Tuberculosis is an infectious disease caused by Mycobacterium Tuberculosis, primarily affecting the lungs but capable of spreading to other organs. TB infection is airborne, spreading through coughs and sneezes. While it is preventable and treatable, it remains a leading cause of death world wide, particularly in low-middle income countries.

- Over 10 million people are diagnosed with TB each year.
- In 2023, TB remained one of the top infectious disease killers, second only to COVID - 19.
- Drug - resistant TB or MDR - TB is an increasing concern with more than 5 lakh cases annually.
- TB is curable, yet millions lack access to timely diagnosis and treatment.

Challenges in TB Eradication:-

- 1) **Drug Resistance-** Multi - drug-resistant TB (MDR- TB) is difficult to treat, requiring longer and more expensive treatment.
- 2) **Limited access to Health care** - Many TB patients, particularly in remote or conflict affected regions, struggle to receive timely diagnosis and care.
- 3) **Funding Gaps** - The fight against TB is underfunded. The World Health Organisation (WHO) estimates a dollar 2 billion annual gap in TB research and response efforts. Indian Government spends around 1.9% of its GDP on the health sector in the year 2024 to 25.
- 4) **Co-infections with HIV-** People living with HIV/AIDS are at a much higher risk of developing TB, complicating treatment outcomes.

Theme - "Yes, We can End TB - Commit, invest, Deliver".

The World Tuberculosis Day - 2025 theme is a powerful call to action for governments, health organizations and individuals to accelerate efforts toward eradicating Tuberculosis. The theme emphasizes three key pillars.

1) Commit - Strengthening Global and National efforts.

Commitment is the foundation of TB elimination. Without strong political will and leadership, the fight against TB will continue to face setbacks. The WHO End TB strategy sets ambitious targets, but achieving them requires -

- Governments to prioritize TB elimination in national health agendas
- Stronger policies that ensure universal healthcare access for TB patients.
- Collaboration between countries researchers and health organizations to share best practices and strategies.
- Public awareness campaigns to fight stigma and encourage early diagnosis.

2) Invest - Boosting Financial and Technological Resources

TB eradication requires sustained financial investment to develop new diagnostics, vaccines and treatments.

Key investment areas include - Developing new TB vaccines.

- Expanding rapid TB diagnostics - Advances in AI driven diagnostic tools can help detect TB earlier and more accurately.
- Improving access to treatment - Investing in shorter, more effective TB drug regimens can improve patient outcomes and combat drug - resistant TB (MDR-TB). Example - In 2023 new TB treatment regimens such as BPaL (Bedaquiline, Pretomanid and Linezolid) significantly reduced treatment duration for drug-resistant TB from 18 to 24 months to just 6 months. Increased investment will make these treatments more widely available.

3) Deliver - Taking Action and Achieving Results - Commitment and Investment must lead to real, measurable progress in TB elimination. This means ensuring that policies and funding translate into tangible health improvements.

- Scaling up TB treatment coverage, so no patient is left behind.
- Ensuring equitable healthcare access for vulnerable populations, including those in remote areas, conflict zones and low-income communities.
- Holding governments and organizations accountable for meeting TB elimination targets.
- Encouraging global partnerships to ensure TB response is shared responsibility. The Stop TB Partnership has been working with governments to implement the Global Plan to End TB 2023-2030, which aims to reduce TB deaths by 90% by 2035. More countries must step up and deliver on their commitments to meet these targets.

The theme - "Yes we can End TB - Commit, Invest, Deliver" is more than just a slogan - it is a global mission. Every country, community and individual has the role to play in the fight against TB. By strengthening political commitment, increasing financial investment and ensuring effective healthcare delivery, we can make TB history. This World TB Day, let's move beyond awareness and take real action to end tuberculosis once and for all.

Together, we can end TB.

DR. RAJENDRA H. TRIVEDI

Editor

IMA Mumbai Branch

From The President's Desk

My dear brothers and sisters, kindly accept my humble Greetings.

In the month of March we shall observe various significant days. On 13th March 2025, we shall observe World Kidney Day the theme for the same is 'Are your kidneys ok?' Detect Early, Protect Kidney Health. Restricted use of sugar, salt and abundant use of water intake will keep our kidneys healthy. Also avoiding pain killers (NSAID) will improve longevity of kidneys.

On 24th of March, we observe World Tuberculosis Day, a day of significance marking Dr. Robert Koch's ground breaking announcement in 1882, of the discovery of the 'Mycobacterium Tuberculosis' a deadly microorganism. The four pillars of tuberculosis are Detect, Treat, Prevent and Build (DTPB); these are part of the National Strategic Plan (NSP) for TB Elimination in India. The theme for World TB Day 2025 is 'Yes! We can End TB: Commit, Invest, Deliver. It is a call for mission to end Tuberculosis by 2030.

8th March is celebrated all over the World as International Women's Day. A woman named Clara Zetkin (Leader of the women's office for the Social Democratic Party in Germany) tabled the idea of an International Women's Day. She proposed that every year in every country there should be a celebration on the same day, to press their 'Demands'. The theme for 2025 International Women's Day is for all WOMEN and GIRLS: RIGHTS, EQUALITY, EMPOWERMENT.

What is the role of woman in Life of a Family? WOMAN is a wonderful Gift given to mankind.

She can play many roles in single identity.

She can be a Mother, to take care of a child.

She can be a Wife, to lovingly look after husband.

She can be a Child, to a mother to give her happiness.

She can be a best Cook, to prepare best food for family.

She can be the 1st Teacher for the learning offspring.

She can be the Accountant, to look after household needs.

She can be the best HR manager, to maintain discipline in the house.

She can be the best Doctor, in the house to look after health of family members.

She can be best Nurse, to offer tender care for the ailing members of family.

She can be the best Priest, to preach and practice holy rituals in the family.

She can be the best Judge, to settle fight in the family; by giving gentle judgement of compromise.

She can be a Financer, by giving help in need an amount which she has saved as petty cash savings from household expenses.

In all she is one man show in women form.

We must salute her ability and sincerity not only on this international women's day but day in and day out. This may reciprocate only partly the debt, we owe to her compassionate behaviour.

Dear colleagues this is my last presidential address, in BIMA, as my tenure as a President is nearing completion.

I am grateful to you all for unstinted support throughout the year.

Regards

Jai Hind!

Jai IMA!

DR. GIRISH LAD
President
IMA Mumbai Branch

WHY BECOME A MEMBER OF INDIAN MEDICAL ASSOCIATION (IMA)?

Dear colleagues,

Indian Medical Association (IMA) is the largest and the fastest growing non-government organization (NGO) of **over two and half lakhs health care providers**. It spans across the country and has over **1800** branches. It attracts a variety of physicians from MBBS doctors, specialists and super specialists from urban, sub-urban and rural India and a wide age span. The primary mission of IMA is to unite the medical fraternity under one banner and ultimately advance the medical science for the betterment of the masses. Simultaneously, it seeks to safeguard the interest of the medical fraternity in this ever changing milieu of medical profession.

In the light of this ever changing field, Medical Council of India (MCI) has recently recognized the importance of continuous medical education (CME). It has now become mandatory that the medical fraternity comply with the CME credit hours regulation to renew their medical registration. **IMA is accredited by the MCI to grant credit hour points to doctors** and has taken the onus of advancing this complex field by hosting regular conferences, CME's which are very well received.

ACHIEVEMENTS OF IMA

1. There is an increasing threat to the safety of doctors especially the young ones. Because of constant representation of these concerns by IMA to the state government of Maharashtra, there is now a **law in place to protect the doctors and its establishments**.
2. Similar efforts are being undertaken by the IMA at the central government also.
3. IMA is successful in motivating the Standing Committee in Delhi to summarily **reject the NCHRH Bill (National Council for Human Resource in Health)**.
4. The draconian CEA (**Clinical Establishment Act**) was strongly opposed by IMA. IMA was successful in drafting a **Maharashtra specific CEA** which is both doctor and patient friendly.
5. There are stringent rules set forth for renewing licenses for nursing homes, firefighting provision rule, FDA regulations and PCPNDT Act etc. IMA is engaged with the concerned agencies in streamlining the process and create a hassle free environment for medical profession.

BENEFITS AVAILABLE TO IMA MEMBERS

- 1) IMA is accredited by the MCI to **grant credit hour points** to doctors.
- 2) **Medico-legal cell** help round the clock for the members.
- 3) **Profession Protection Scheme (PPS)** (Indemnity – 10 Lakhs) at nominal fees.
- 4) **Airing your views and grievances** through BIMA (Bulletin of IMA)

Social Security Schemes popular as "**Make your Nominee a Millionaire**", gives benefits to the next of kin of the deceased life member.

Guest room facilities available in IMA branches all over India at highly concessional rates (List Available at IMA office).

50% discount on rent of IMA Hall (renovated) and Lawns.

Discounts on purchases of new car and on car insurance renewals.

Membership is transferable all over India.

The MCI recommends that every graduate be a part of a recognized medical association and IMA fulfils this mission perfectly. IMA is a perfect platform for all the practitioners, particularly for young practitioners who are still learning the nuances of medicine and work of this profession. The best part is that the IMA membership is transferable to any part of India. We welcome you all to share your interest with us.

Heavy Discount on Membership fees from 15th February 2025 to 31st March 2025

For Single Life Membership Fees - Rs. 17,541/- (Saving Rs. 2,861/-)

For Couple Life Membership Fees - Rs. 26,301/- (Saving Rs.4,289/-)

For to be Clubbed Membership Fees - Rs. 9,658/- (Saving Rs.1,504/-)

Cheque to be drawn in favour of "Indian Medical Association Mumbai Branch"

DR. Girish Lad
President

(M) 98204 82375

Secretary Communicates

Dear Friends,

IMA Mumbai branch had the following activities during the month of February & March 2025

1st and 2nd February 2025: 1st & 2nd February 2025: Office Bearers Meeting and IMA MS 1st State Executive Committee Meeting was held on 1st and 2nd February 2025 at IMA Mumbai Branch. This time we had a record registration of 200 delegates. President IMA MS Dr. Santosh Kadam and Hon. Secretary Dr. Anil Avhad conducted a Marathon Meeting with Power Point Presentation. All the delegates appreciated the hospitality by IMA Mumbai Branch.

9th February 2025: "Out Station Picnic Report" IMA Mumbai Branch had organised Out Station Picnic on 10th February 2025 at Monteria Resort, Karjat to spend time in the lap of nature, away from busy schedule.

Reaching to the venue we had the breakfast followed by scientific session. Dr. Manish Hinduja spoke on Minimal Invasive Cardiac Surgery & Dr. Rahul Ghadge spoke on Interesting Cases in Psychiatry which were well appreciated and applauded by all. It was followed by swimming session and lunch.

At 8 pm all members gathered in the conference room to enjoy entertainment programme like singing, mimicry, jokes & dancing on DJ Sound.

Eye-catching part was the involvement of the member's kids who presented dance on songs and sung poems. It added so much joy and laughter to the day in the cheerful atmosphere. It was just FUN! It went on till 11 pm. Members gathered on next day morning in the Cafeteria (Monday, 11th February) at 8 am for Tea- Breakfast.

At 10 am we left for Mumbai and reached at IMA Hall at 12 noon in the afternoon. Following members had attended the picnic Dr. Usha Shah, Dr. Yogesh Shah, Dr. Girish Lad, Mrs. Sharmila Lad, Dr. Hozie Kapadia, Mrs. Kapadia, Dr. Pankaj Bandarkar, Dr. Reeta Bandarkar, Dr. Sharvari Bandarkar Rane, Mr. Viraj Rane, Dr. Anil Avhad, Dr. Pushpa Sanap, Dr. Sujatunnisa Attar, Dr. Pragji Vaja, Dr. Anil Pachnekar, Mrs. Rohini Pachnekar, Dr. Luv Pachnekar, Mrs. Pachnekar, Dr. Surendra Shingnapurkar, Dr. Jitesh Mehta, Dr. Asha Mehta, Dr. Vibhakar Adhvaryu, Mrs. Adhvaryu, Dr. Dinesh Prabhu, Mrs. Prabhu, Dr. Rajendra H. Trivedi, Mrs. Pratima Trivedi, Dr. Kajal Ahuja, Dr. Arjun Ahuja, Dr. Mukund Umra, Dr. Mrudula Umra, Dr. Mangala Gomare, Dr. Jagdish Keny, Dr. Manish Hinduja, Mrs. Hinduja, Dr. Rahul Gadge.

16th February 2025 : - Multispeciality CME was organized by IMA Mumbai Branch. The speakers and their topics: Dr. Bharat Shivdasani - Worsening Heart Failure Management, Mr. Sunil Damania - From Medicine to Markets: Growing Wealth with Equity Investments, Dr. Priti Mehta - Indication for BMT in pediatric, Dr. Charulata Savant Sankhla - Treatment of Parkinson disease, Dr. Aparna Govil Bhaskar - Recent Advances in Management of Obesity, Dr. Ashok Kirpalani - Time to act in CKD with T2D : Finerenone as a pillar of Treatment improving cardio renal outcomes, Dr. Pradeep Talwalkar - Are AGIs just 'good to have' or 'must to have' for Indian patients? and Dr. Manish Baldia - Advance Neuromodulation therapies for neurological disorders.

16th February 2025: "Report of Blood Donation Camp" IMA Mumbai Branch had organised Blood Donation Camp in association with Graduation Celebration Organising Committee (students of 2019 batch) and KEM Hospital Blood Bank on 16th February 2025 at Ladies Common Room, Ground floor, Seth G. S. Medical college building, Parel from 9 am to 2 am pm. It was inaugurated by the hands of Dr. Pankaj Bandarkar-Chairperson Blood Donation Committee. Total 81 students donated blood.

Gifts (Sling Bag & Scissors) were given to each donor. It was a successful program.

23rd February 2025 :- "Super Sixes Cricket Tournament" was held on Cricket Turf at IMA Ground, Haji Ali on 23rd February 2025. More than 66 members including their family members and JDN Members had participated.

There were total A, B, C and D teams. The captains were Dr. Milind Toraskar for A team, Dr. Shingnapurkar for B team, Dr. Girish Rajadhyksha for C team and Dr. Girish Lad for D team. Morning breakfast and afternoon lunch were served.

Sr. Vice President Dr. Surendra Shignapurkar, Organising Chairman Dr. Sujatunnisa Attar welcome the delegates and Hon Secretary Dr. Pragji Vaja conducted the Inauguration Ceremony. IMA National Vice President Dr. Shivkumar Utture, Chief Guest and President Elect IMA MS Dr. Santosh Kadam, Guest of Honour, addressed the delegates and informed them about the importance of Geriatric Medicine taking in consideration rapidly rising Geriatric population in India. The occasion was graced by Treasurer IMA MS Dr. Vikram Desai, many Past IMA MS Presidents and dignitaries from all over the Maharashtra.

24th November 2024:- 54th Annual Conference 2024 of IMA Mumbai Branch was held at ITC Grand Central, Parel, Mumbai. More than 300 delegates from Mumbai participated in this conference. Renowned and distinguished speakers expressed their expert opinion in their respective field of specialty. The speakers were:- Dr. Ajay Phadke, Dr. Dr. Anil D'cruz, Dr. Tushar Rege, Dr. Bhavesh Popat, Dr. Sachin Trivedi, Dr. Tapankumar Saikia, Dr. Rashmi Saraf, Dr. Alok Sharma, Dr. Aabha Nagral, Dr. Aditi Dani, Dr. Shrinivas Desai, Dr. Sumeet Pawar, Dr. Shyam Rathi, Dr. Jeenam Shah and Dr. Nikesh Jain.

The Inauguration ceremony started at 9.00 am. The Master of Ceremony was Dr. Jitesh Mehta and Dr. Sujatunnisa Attar. National Vice President Dr. Shivkumar Utture as a Chief Guest, IMA Maharashtra State President Dr. Santosh Kadam and IMA Maharashtra State Hon. Secretary Dr. Anil Avhad as a Guest of Honour graced the occasion. After IMA Prayer and IMA Flag salutation dignitaries on the dais and off the dais were welcomed with floral bouquet. Hon. Secretary Dr. Pragji Vaja read the Secretary's report & President Dr. Girish Lad delivered his presidential address. Guest of Honor Dr. Anil Avhad in his speech thanked IMA Mumbai branch for his successful journey till date and he also assured to do the best for the welfare of the medical community during his tenure. Dr. Santosh Kadam appreciated the efforts put in by team IMA in organizing this conference in his speech. Chief guest Dr. Shivkumar Utture, Vice President IMA HQ spoke on all burning issues of the faculty and requested all to remain united under IMA umbrella for the safe future. The delegates appreciated the scientific deliberations and enjoyed gourmet delights. The collective efforts of all the members made this conference a grand success.

REPORT OF BIMA SUB- COMMITTEE

BIMA reaches the members regularly in the first week of every month and eBIMA is placed on our official website. We are very thankful and grateful to Dr. Shivkumar Utture, Dr. Jitesh Mehta, Dr. Anil Avhad, Dr. Arvind Patel and Dr. Vijay Karanjkar for their help, encouragement and support in making e-BIMA popular.

IMA Mumbai Branch, BIMA Extempore Elocution Competition for "Dr. V. H. Salaskar Rotating Trophy", "Dr. J. J. Merchant Oration" and "Multi Specialty" CME was held at IMA Mumbai Branch on 26th January 2025.

1st Prize and Dr. V. H. Salaskar Rotating trophy was bagged by Dr. Sunil Jain,

2nd prize winner - Dr. Sachin Patharkar,

3rd prize winner - Dr. Surendra Shingnapurkar.

A separate Extempore Elocution Competition was held for IMA JDN / MSN members.

1st prize winner - Dr. Subhasri Subhadarsini

2nd prize winner - Dr. Aditya Prashant Thakare

3rd prize winner - Dr. Neha Savla.

All the participants were knowledgeable, efficiently elaborated their points of view. Congratulations to all the winners. The programme was a very well conducted by Editor BIMA Dr. Rajendra H. Trivedi and BIMA Secretary Dr. Vijay Karanjkar. The Judges were Dr. Vijay Panjabi, Dr. Aspi Raimalwala, and Dr. Ajoy Saha. The entire programme was a grand success.

I am sure with the cooperation of all the members we will be able to achieve our goal of making eBIMA the best news bulletin in India.

MEDICAL NEGLIGENCE- A LEGAL CONUNDRUM FOR PRACTISING PHYSICIANS

Negligence is simply the failure to exercise due care. The three ingredients of negligence are as follows:

1. The defendant owes a duty of care to the plaintiff.
2. The defendant has breached this duty of care.
3. The plaintiff has suffered an injury due to this breach.

The term “medical negligence” is an omnibus one, which has come in vogue to refer to wrongful actions or omissions of professionals in the field of medicine, in pursuit of their profession, while dealing with patients. Medical Negligence basically is the misconduct by a medical practitioner or doctor by not providing enough care resulting in breach of their duties and harming the patients which are their consumers. It is the omission to do something which a reasonable man, guided by those considerations which ordinarily regulate the conduct of human affairs, would do or doing something which a prudent and reasonable man would not do.

The existence of doctor–patient relationship is a prerequisite to fasten liability pertaining to medical negligence on the doctor. The relationship is fiduciary in nature. A basic knowledge of how judicial forums deal with the cases relating to medical negligence is of absolute necessity for doctors. The need for such knowledge is more now than before in light of higher premium being placed by the Indian forums on the value of human life and suffering. The judicial forums tend to give sufficient leeway to doctors and expressly recognize the complexity of the human body, inexactness of medical science, the inherent subjectivity of the process, genuine scope for error of judgment, and the importance of the autonomy of the doctors. The law does not prescribe the limits of high standards that can be adopted but only the minimum standard below which the patients cannot be dealt with.

Basic Features of Medical Negligence and Standard of Care

To comprehend the scope of negligence, it is important to understand the scope of the duty imposed on a doctor or medical practitioner. A doctor or other medical practitioner, among others, has a duty of care in deciding whether to undertake the case or not, duty in deciding what treatment to give, duty of care in administration of that treatment, duty not to undertake any procedure beyond his or her control, and it is expected that the practitioner will bring a reasonable degree of skill and knowledge and will exercise a reasonable degree of care. Negligence, simply put, is a breach of duty of care resulting in injury or damage. It is well accepted that in the cases of gross medical negligence the principle of *res ipso loquitur* is to be applied. *Res Ipsa loquitur* means things speaks for itself; while deciding the liability of the doctor it has to be well established that the negligence pointed out should be a breach in due care which an ordinary practitioner would have been able to keep.

The consequences of legally cognizable medical negligence can broadly be put into three categories:

- (i) Criminal liability,
- (ii) Civil liability-monetary liability, and
- (iii) Disciplinary action – by Medical Councils.

Criminal liability under Section 304A of IPC3 (which deals with the death of a person by any rash or negligent act and leads to imprisonment up to 2 years) is used to deal with medical negligence leading to the death of a patient. Similarly, other general provisions of IPC, such as Section 3374 (causing hurt) and 3385 (causing grievous hurt), are also often deployed in relation to medical negligence cases. Here the Medical Practitioner can be jailed or fined or both as per the discretion of the judge.

Civil liability, i.e., monetary compensation can be fastened under the general law by pursuing a remedy before appropriate civil court or consumer forums.

Professional misconduct by medical practitioners is governed by the Indian Medical Council (IMC) (Professional Conduct, Etiquette, and Ethics) Regulations, 2002, made under IMC Act, 1956. NMC and the appropriate State Medical Councils are empowered to take disciplinary action whereby the name of the practitioner could be removed forever or be suspended or a warning can be issued.

The line between civil liability and criminal liability is thin, and no sufficiently good criteria have yet been devised by the Supreme Court providing any clear and lucid guidance. The Supreme Court put the standard for fastening criminal liability on a high pedestal and required the medical negligence to be “gross” or “reckless.” Mere lack of necessary care, attention, or skill was observed to be insufficient to hold one criminally liable for negligence. In Jacob Mathew v. State of Punjab case the judiciary endorsed the approach of high degree of negligence being the prerequisite for fastening criminal liability. In order to hold the existence of criminal rashness or criminal negligence, it shall have to be found out that the rashness was of such a degree as to amount to taking a hazard knowing that the hazard was of such a degree that injury was most likely imminent. It has been held by the courts that in the cases of medical negligence, **Bolam test** is to be applied, i.e., “standard of the ordinary skilled man exercising and professing to have that special skill,” and not of “the highest expert skill.” This is applicable to both “diagnosis” and “treatment.” Errors of judgment do not necessarily imply negligence. Gross mistakes would, however, invite the finding of negligence such as use of wrong drug or wrong gas during the course of anesthetic process, delegation of the responsibility to a junior with the knowledge that the junior is incapable of performing the duties properly, removal of the wrong limb, performing an operation on the wrong patient or injecting a drug which the patient is allergic to without looking at the outpatient card containing the warning, and leaving swabs or other items inside the patients.

In the cases involving medical negligence, at the beginning, the person alleging the negligence has the initial onus to make out a case of negligence, and thereafter the onus shifts on to the doctor or the hospital to satisfy that there was no lack of care or diligence. While dealing with medical negligence cases, the opinions of the medical experts are often called for from both sides. The real function of the expert is to put before the court all the material together with reasons which induce him to come to a certain conclusion so that the court, even though not an expert, may form its own judgment using its own observation of those materials

Keeping in the view the rise in criminal prosecution of doctors, which is both embarrassing and harassing for them, and to protect them from frivolous and unjust prosecutions Supreme Court laid certain binding guidelines till statutory rules or instructions by the government in consultation with MCI are issued, which are as follows

- (1) Private complaint may not be entertained unless the complainant has produced prima facie evidence in the court in the form of a credible opinion given by another competent doctor
- (2) Investigation officer should obtain an independent and competent medical opinion preferably from a doctor in government service qualified in that branch of medical practice who can normally be expected to give an impartial and unbiased opinion applying Bolam test to the facts collected in the investigation
- (3) The necessity for obtaining independent medical opinion was insisted upon considering that the knowledge of medical science to determine whether the acts of medical professional amounts to negligent act within the domain of criminal law could not be presumed. This requirement was subsequently sought to be made a necessity by the Supreme Court even for initiating the action seeking imposition of civil penalties but was done away with thereafter for civil actions.
- (4) Doctor may not be arrested in a routine manner unless the arrest is necessary for furthering the investigation or for collecting the evidence or if the investigation officer is satisfied that doctor may flee.

MEDICAL NEGLIGENCE AND STATE MEDICAL COUNCILS

Medical councils have the disciplinary control over the medical practitioners. They have the power to remove the names of medical practitioners permanently or for a specific period from the medical registers when after due inquiry they are found to have been guilty of serious professional misconduct. There are two grounds on which the council may initiate disciplinary against any medical practitioner namely (a) conviction of any offence by a court of law and (b) guilty of professional misconduct. Any conduct of the practitioner which brings in disgraceful to the professional status what is known as “serious professional misconduct,” for e.g. adultery or improper conduct or association with a patient, conviction by a court of law for offences involving moral turpitude, issuing

false certificates, reports and other documents; issuing certificate of efficiency in modern medicine to unqualified person or non-medical person; performing an abortion or illegal operation for which there is no medical, surgical or psychological indication; contravening the provisions of the Drugs Act and regulation made there under; using touts or agents for procuring patients; publication of identity of a patient without his permission; performing an operation which results in sterility, without obtaining the written consent of patient/relative and refusing on religious grounds alone to extend medical assistance etc. Generally, the council by itself does not start proceedings. The proceedings are started: (i) when a medical practitioner has been convicted by a court of law, and (ii) on a complaint lodged by any person or body against the practitioner. On receipt of the complaint, the same will be placed before the Ethical sub-committee or the Executive Committee which considers the complaint, causes, further investigation and takes legal advice. If no prima facie case is made out the complainant is communicated accordingly. On contrary, a prima facie case is established, a notice is issued to the practitioner specifying the nature and particulars of the charge and directing him to answer the charge in writing or to appear before the committee on the appointed day. It is extremely important to respond to the notice sent by the Council and send a detail answer to all the allegations made by the complainant within the timeframe given by the Council. The complainant and the Medical Practitioner are allowed to personally give evidence or be represented by a Legal Professional during the preliminary hearing. (If the Doctor is very sure that he has not been negligent then he could personally defend himself, but if there is any doubts then it is always advisable to hire a lawyer who is well conversant with Medico-Legal cases. This is where Medical Indemnity especially thru a recognized association would go a long way to tide over this critical phase.) After the proved, then a Charge sheet is filed against the Medical Practitioner and a full-fledged hearing is conducted wherein both parties are allowed to bring in expert witnesses. At the end of the hearing the Executive Committee / Council must vote again and decide whether the name of the practitioner should be removed from the register permanently or temporarily or he should be warned, not to repeat the offence or acquitted.

Any person working in a profession like medicine, law, accounting, etc. where specialized training, experience, and judgment are involved will get sued. The focus shouldn't be on avoiding lawsuits since they are inevitable. The focus should be on being prepared for the inevitable suit. This can mean many things, such as having the proper paper trail, having good insurance, knowing a good lawyer, etc.

The Cardinal rules to be followed to avoid potential litigations and protect oneself are

- (1) Documentation: this is a big one.
Full record of the diagnosis, treatment, etc., should be maintained."
In many potential conflicts there is a he-said-she-said scenario and the courts must decide who is telling the truth. The doctor's documentation of every patient interaction is not simply to facilitate continuity of care, but to protect the doctor against invalid or inaccurate reports from their patients.
- (2) Doctor's demeanor: as a counterpoint to the last item, it is well accepted that doctors are much less likely to be sued if they are liked by their patients. Being friendly and conveying care and compassion in patient interactions is important.
- (3) No prescription should ordinarily be given without actual examination. The tendency to give prescription over the telephone, except in an acute emergency, should be avoided
- (4) A doctor should not merely go by the version of the patient regarding his symptoms but should also make his own analysis including tests and investigations where necessary
- (5) A doctor should not experiment unless necessary and even then he should ordinarily get a written consent from the patient
- (6) An expert should be consulted in case of any doubt.

Doctors can best handle a medical malpractice lawsuit by remaining calm. The process generally takes a long time, and much of it is beyond the physician's control. Following the standards of care, keeping good documentation and having malpractice coverage are important steps to preventing a case. In the event of a lawsuit, make sure to lean on a support group, trust legal counsel and continue doing the best job possible.

There is nothing more frightful than ignorance

ETHICS IS KNOWING THE DIFFERENCE BETWEEN WHAT YOU HAVE A RIGHT TO DO AND WHAT IS RIGHT TO DO

Membership Promotion Sub - Committee Report 2024-2025

The Mumbai branch of IMA is very active in increasing membership of the Association. In the post scenario we have poor response for new membership. We invite young doctors to join IMA to strengthen the Association which is the need of the hour. IMA Mumbai Branch has total 4321 members on 18/03/2025. This year we have added 43 new members.

Single Life Member - 29
Couple Life Member - 7 (14)

We thank the President and managing committee members for their help to make new IMA members

AAO GOAN CHALEN REPORT

Greetings from Aao Gaon Chalen team,

The team visited different villages this year besides sonale, like village Kurunje, Kambhare and Kurje which are located nearby our Aao Gaon Chalen village Sonale.

A total of 657 male and female patients from villages and ashram Shala were examined.

Morbidity pattern was as follows gynec patients 23 ,Skin infections were 27, URTI 42 , anaemia 43, Diabetes 28, hypertension 19, Free medicines were distributed to all the patients so examined. Free medicines were distributed for one month each time for anaemia, hypertension and diabetes patients and follow up was maintained.

Special camps were held for identification of women's health problem, anaemia detection, hypertension and diabetes detection and checkup of ashram shala students.

Donation of Rs.10,000/- was collected by two students from Florida USA Miss Ariana and Miss Anoushka Rohan Desai for distribution of Reusable sanitary pads which were distributed to 216 young girls and mothers in order to have good reproductive health.

Health education was given to 480 women and young girls regarding nutrition, correct cooking practices, cessation of tobacco and anaemia control measures, and reproductive health.

Overall the rural Aao gaonchalen camps were a big success.

**BIMA TARIFF
FOR ADVERTISEMENT IN BIMA
THE BULLETIN OF INDIAN MEDICAL ASSOCIATION, MUMBAI BRANCH**

BIMA, the mouth piece of IMA Mumbai branch reaches 5000 members per month, which includes leading Family Physicians, Consultants, Super Specialists and Hospitals of Mumbai and pan India.

Articles by specialists on current issues and trends in medicine make an interesting reading. BIMA has won the "Best Bulletin Award" for its educative, informative and presentable value from both IMA national and state offices.

The rates of advertisement in BIMA are very attractive. Pharmaceutical Companies, Hospitals, Nursing Homes, Diagnostic Centers, Poly Clinics, Pathology labs, Banks, Manufacturer of Hospital equipment, etc. can use this media for their wide spread publicity amongst the elite.

New reduced advertising rates effective from 1st December 2022
